Encyclopedia of Chess-Prehistory · Programming Language Chess

Informations about the contents of the prehistoric book:

Age: Chess is according to its data **the oldest prehistorical book of human being.**
Older than Sanskrit. Older than the Pyramids Scriptures. Volume 5.

Archäo- By our sun the cosmos has --> influence on each human being.

Astronomy: Every planet has a prime number and by radiation of the sun --> takes effect on each living creature. Volume 1.

Encyclopedia for looking up, for discovery, for reading and study the programming language Chess.
Each book is 1 step --> till the highest aim of realization + knowledge + discovery.
Extensive knowledge what has happened thousands of years ago. The extensive self-knowledge in the presence.

Evolution: The earth is the second inhabited planet in our planetary system.

Film: The Chess Code-Game is the oldest programmed Slow-Motion-Film,
with a prehistorical course in time-units move-by-move. Volume 3 + 11.

Geography: The projection of the board-coordinates --> on the surface of the earth (volume 10)
discovers the spiral-local starting point with the prehistorical map.
Here everybody is told, **locally where** the chess comes from.

History: Become history-discoverer. Find out the spiral 0 x 0 starting point. Volume 1 + 4.
The retriever of data decrypts itself and discovers Jupiter. Here astronomy-history gets alive.
Whether young or old: discover which messages were sent by the chess-author many thousands years ago
--> to you in private encrypted message.
Here everybody is told, **temporally when** the chess contents have been programmed.

Informatics: Everybody can learn to translate the prehistorical programming language.

Language: The numeral language is a programmed language **without** change.

Periods: The 7 periods pulsate in every person.
The death-period gives rebirth + kills. Volume 5.

Rebirth refers to the data-rebirth of the programming language,
whose sequence is programmed exactly with its advantages and disadvantages for all people.
